

THE MODERN SCHOOL, ECNCR

NEWSLETTER

March 12, 2020

Dear Parents,

As the session is coming to close, it is time for me to inform you about the coming period.

The School's Hostel will be operative with almost immediate effect. This will provide the best possible hostel facilities in any school in the country. Comfortable living accommodation ensuring safety, cleanliness, good housekeeping with regular laundry and proper washrooms are an essential part of the facility. Meal arrangement having adequate nutritious food, using the best ingredients and variation in menus, giving due consideration to vegetarian and non-vegetarian students is being ensured.

The kitchen facilities will also cater to the requirements of students and teachers staying back and will obviate the need to obtain food from outside.

The school will also make arrangements to provide facilities to the hostel students requiring any special or remedial tuition. This arrangement will also be available to day scholars, in case they wish to avail the same.

The next stage of infrastructure development includes not only more classrooms, but also a multipurpose hall, more facilities for indoor games as well as completion of a swimming pool. The swimming pool can also be available on suitable terms for use at specified hours to parents.

In continuation of the school's commitment to provide the best opportunities to its students, the school also proposes to work out programme of studies for those students who wish to prepare for specified exams required for entrance to the premier Engineering and Medical Colleges. This would not interfere with the ongoing curriculum for the standard CBSE exams.

To further motivate our students, the school shall institute Scholarships and Awards to recognise excellence in academics as well as achievements in sports and co-curricular activities.

Teacher development programmes to add to the quality of teaching, keeping in touch with new developments in methodology and inculcating core values and emotional growth will also be arranged to synchronize with the other schools in the Modern School family.

We believe that this Centenary year of the foundation of the original Modern School will prove to be a landmark in the development and the thrust to maintain the institution as a leader and path breaker in School Education for years to come. This will only be achieved with the active cooperation and participation of the parents with the focus to enable students of the school to emerge as confident citizens of the future.
